

- 1 **Locker:** Provides enough space for everything that is important to students.
- 2 **Seat niche:** Here students like sitting to work or play.
- 3 **Fabric range:** Wide range of colours and fabrics, B1 tested.

## CORRIDORS OFFER SPACE - ALSO FOR NEW IDEAS.

### STORAGE UNIT SYSTEM FLEXIBLE, FIRE RESISTANT AND COLORFUL.

Students are not known for their love of order. So it's good when a clever storage system helps you to keep order. With the lockers and seating niches from A2S wide corridors can be put to good use, providing plenty of space for everything that is important to students.

Our storage system can be customized according to your budget and space to various needs and challenges. And with its bright, cheerful colours visually it makes an important contribution to a more relaxed school life.

Whether it is primary school or vocational high school - our storage system adapts perfectly to specific needs. Pull out shoe lockers with a non-slip seating surface allow smaller pupils to reach the upper storage compartments. The seating niches are available in a work/play table version for primary school pupils, and a comfortable upholstered bench for older students.

Thanks to the B1 design and the firmly anchored components, the storage system can withstand any challenge - thus ensuring school life in which everything has its place.

#### BENEFITS

- Flexible for different spaces and budgets
- B1 design and thus low flammability
- In 2 different widths for 1 or 2 students
- Tidy boxes that fit under the A2S tables
- Pull-out stool, with non-slip properties
- Robust hanging rail for coats
- Cabinet-high handle, keeps escape routes free and is easy to reach from any height
- Extendable top cupboard with plenty of storage space
- Height-adjustable base for protection against moisture
- All lockers can be supplied with locks on request

### INTERIOR DESIGN CREATES MORE ROOM WHILE SAVING SPACE.

When the school days are long and the classroom small, one should use the available space as intelligently as possible. With the A2S storage system space is available where it is needed - in the corridors, connecting the classrooms. Bags and jackets are stowed quickly and alcoves invite you to play, work and meet friends.

But the A2S storage system can do even more: Unlike many other providers, this furniture has low flammability but is still far from being heavy and unsightly metal boxes.

So everyone benefits from the A2S storage system: the students who are always happy to have more space. The teachers, who no longer have to get upset about the disorder in the corridors. And the class funds, because this storage system fits any school budget.

BASIC ELEMENT

3 HEIGHTS EACH WITH 2 WIDTHS

MISCELLANEOUS EQUIPMENT

DID YOU KNOW ...?

With the the highly compatible basic elements in two widths, 3 heights as well as the various alternative designs and surface colours, any corridor can be optimally planned and designed.

Additional seating alcoves create cosy areas without having to change fire escape routes.

SEAT NICHES
